<b>Activity</b>	<p><b><u>START SOTF Team 6 Activity:</u></b></p> <p>SOTF#6 Kevin Johnson (START), Enbridge Team Lead Loren CaSale, and Leica operator Amber McDougal performed poling at 48 total locations. With 38 locations within focus area 37.75 (downstream of E4 control point) and 10 locations within 37.50 (upstream of E4 control point). A total of 14 locations had an overall submerged oil category of heavy, 16 locations had an overall submerged oil category of moderate, and 15 locations had an overall submerged oil category of light. Three locations had no signs of submerged oil.</p> <p>Generally, more light oil sheen was observed along areas of sand/gravel substrate associated with the central river channel with more moderate and heavy oil sheen observed along silt/soft substrate adjacent to central river channel. Globules up to 1.0 cm were identified in locations having soft and silt based substrate.</p> <p>Twenty-nine locations SOTF #6 visited registered above the minimum temperature requirement of 60 degrees F. Nineteen locations indicated temperature readings below 60 degrees F. Observed temperatures ranged from 58.6 to 65.2 degrees F.</p> <p>Poling operations were not significantly impacted by vegetation or environmental</p>			

	conditions within focus areas. SOTF#6 was able to successfully navigate to all tasked poling reassessment locations.
<b>Health and Safety Issues</b>	None
